Utah State Tax Commission Corporate Statistics Tax Year 2012

Economic and Statistics Unit

prepared by Jacoba Larsen 19-Jun-14

2012 Utah Corporate Income Tax Statistics

The data in this publication give a fairly complete picture of the corporate franchise tax in Utah. Corporate income taxes are not only complicated by their logic, but also by their timing. The data reported here represent a snapshot of how the data stood for tax year 2012 as processed through May 2014.

Statistics

For the majority of these statistics, the data is "Utah apportioned data," meaning that it has been multiplied by a factor that determines the Utah portion of a national figure for tax purposes. Since Utah has a minimum tax payment of \$100 per taxable unit, some taxpayers pay a tax independent of their income. For this reason, we have divided the data into those that are minimum taxpayers and those that really are income-based payers. We have also reported the data according to industry sector as defined under the North American Industrial Classification System (NAICS).

Corporate Income Tax: Overview

back to table of contents

States do not tax the total national income earned by a corporation doing business within its borders. States may only tax the portion of income generated by the corporation within its borders. However, determining this share is difficult, since assigning the actual profit created in a state is nearly impossible. For example, if XYZ Corporation produces composted fertilizer in Wyoming and ships it to a Utah outlet for sale, where does the profit occur? One could argue that since all the sales occur in Utah, the only cost that can be subtracted from Utah taxable income is the actual cost of production in Wyoming. On the other hand, the firm would want to book this income in Wyoming since profits there are not taxed.

To avoid intractable arguments about where "true profit" occurs, the general practice among states is to divide a firm's income according to its relative economic presence in a state. In determining the share of profits which a state can tax, the Uniform Division of Income for Tax Purposes Act recommends an apportionment formula that equally weights the percentage of a corporation's national property, sales and payroll made within a state. These weights are often referred to as apportionment factors. Utah currently allows the option of an equally weighted formula or a double weighted sales formula, and as of January 1, 2011, is phasing in a mandatory single sales factor for certain industries. In this report, with the exception of tables reporting apportionment, data are reported in Utah apportioned amounts for C-corporations.

The income which is included or excluded from the corporate tax base is complicated, with many nuances and details. In general, the state tax base is close to the federal base, with minor exceptions. Table A reports the magnitude of various income measures for 2012. The tax items and line numbers from the Utah TC-20 are reported along with the aggregate apportioned amounts from each corporation filing in Utah. This table is representative of C-corporations whose tax is based upon income, excluding those who pay the minimum tax.

Table A

Tax Item & Line Numb	er	Amount & Share of	FAGI
Unadjusted Income	01	\$7,283,499,472	100.0%
Adjusted Income	05	\$6,590,443,277	90.5%
Apportionable Income	09	\$6,467,950,574	88.8%
Utah Taxable Income	15	\$6,420,218,721	88.1%
Utah Net Taxable Income	17	\$6,063,155,895	83.2%
Tax	18	\$303,157,917	4.2%

Unknown or Undisclosable	3,269	\$1,277,840	0.4%
Total	20,159	\$305,213,730	100.0%

The Utah Net Taxable Income line shows that after state adjustments, 83.2% (81.9% in 2011 and 84.8% in 2010) of unadjusted income was taxed. The difference between line 15 and 17 represents loss carryforwards (\$357,062,826). The loss carryforwards in 2011 were \$413,634,911. The effective tax rate (tax divided by income) increased to 4.2%, from 4.1% in 2011. There was an increase in C-corporate taxes for tax year 2012.

Table B reports the dollar value and share of taxes paid for non-minimum taxpayers, as reported on tax returns for 2012. The most obvious fact is that the large corporations pay a very large share of corporate income taxes. Companies with a net apportioned income larger than \$1 million paid 91% of the tax and accounted for only 11.1% of total returns. Those with income less than \$100,000 paid 1.7% of the tax but accounted for 65.4% of returns.

Table C is similar in content and structure to the previous table but includes all corporate taxpayers. Mining, manufacturing, management of companies and enterprises, and retail trade were the four largest paying industries in terms of average payment. Mining outpaid manufacturing for the top paying industry on average. The mining industry has the largest average payment, \$66,590. Management of companies and enterprises had an average payment of \$36,389.

^{*} Ratio of corporate to total tax collections.

- † State has no sales tax.
- †† States have no income tax.
- (1) 10.84% on financial institutions. The tax rate on S-Corporations is 1.5% (3.5% for financial S-Corporations).
- (2) 5 for tax years beginning before 2000. As per the passage of Assembly Bill 1452 in 2009, California temporarily suspended the net operating loss carryover deduction for two years and increased the net operating loss carryover period to twenty years, and will phase in a deduction for net operating loss carrybacks.
- (3) Same as applicable federal rules
- (4) 3 years for tax years beginning on or before 1/1/2000.
- (5) 15 years for tax years beginning on or before 1/1/2000.
- (6)7% for corporations filing under a water's edge election.
- (7) 5 years for tax years beginning on or before 1/1/1994.
- (8) Option of 80% Sales, 10% Property and 10% Payroll.
- (9) Option of single sales.
- (10) Double-weighted sales as of 2011
- (11) Certain manufacturers double-weight sales.
- (12) For tax years on or after 5/1/07 sales 100%.
- (13) Double weighted option; beginning Jan. 1, 2011, certain sectors are phased into single sales.
- (14) Oregon's minimum tax for C corporations depends on the Oregon sales of the filing group. The minimum tax ranges from \$150 for corporations with sales under \$500,000, up to \$100,000 for companies with sales of \$100 million or above.
- (15) Taxpayers with \$100,000 or less in Oregon gross sales and no property in the state pay a tax equal to 0.25% of gross sales. The top rate is scheduled to fall to 7.6% in 2011.

http://www.census.gov/govs/statetax/index.html http://www.taxadmin.org/fta/rate/tax_stru.html

There is much variation across states when it comes to corporate income tax policies. Differences arise due to the treatment of throwbacks, loss carrybacks, definitions of business income, apportionment formulas, reporting requirements, and rules with the use of passive investment companies. A few of the main factors are shown in the table above for the Western states. The tax rate varies from 8.84% in California, to the states who impose no corporate income taxes at all (Nevada, Washington, Wyoming). New Mexico is the only state with a bracketed system still in place. States are increasingly moving toward a more heavily weighted sales factor in the apportionment formula. Montana is the only state with a mandatory equal weight apportionment formula. The other states at least have the option of a double weighted sales factor and Oregon moved to single sales factor for tax year 2007. Beginning January 1, 2011, Utah phases into mandatory single sales for certain sectors.

^{**} Many states have exceptions

Corporate Income Tax: Who pays the tax?

back to table of contents

There are several ways of addressing the question "who pays the tax". Is one interested in who sends in the check? Or who finally bears the cost of the tax? For example, with the sales tax the merchant sends in the check, but it is generally assumed that the tax is born by the purchaser. With corporate tax, the corporation initially pays the tax; if it is not passed on, it is the shareholders who bear the tax. However, as corporations react to the tax some of the cost is passed to suppliers, consumers, or workers. The table below answers the question in terms of who sends in the check.

There is ambiguity regarding the composition and activity of a corporation. Often, a corporation is labeled an "out of state business," while some are called Utah corporations. This analysis will address this division according to how much of a corporation's business is done in Utah - its economic presence, rather than its area of incorporation or headquarter location. However, this does not address the complex issue of ownership. Even if a corporation does a lot of business in a state, that does not mean it is owned by Utahns. Most significant corporations are owned by individuals, or groups of individuals, who are spread throughout the country, if not the world, and could be owned significantly by pension funds, insurance companies, churches, universities, or other entities. Unfortunately, tax administrative data cannot address the issue of ownership.

The table below reveals the share of tax paid by corporations classified according to their share of business in Utah. The first column is the average share among the sales made, property owned, and wages paid within the state. Also reported is the number of corporations with a given intensity of economic activity in Utah, along with the aggregate share of tax paid by corporations falling within the relevant range. Finally, the last column cumulates the share of taxes paid by category.

Share of Business in Utah	Number of Businesses	Share of Taxes	Cumulative Share
0%	2,204	0.44%	0.44%
>00%, <=01%	5,228	37.00%	37.44%
>01%, <=05%	1,834	29.49%	66.92%
>05%, <=25%	899	18.20%	85.13%
>25%, <=50%	268	4.26%	89.38%
>50%, <=75%	195	1.56%	90.94%
>75%, <=95%	232	2.76%	93.70%
>95%, <99%	86	0.73%	94.43%
>=99%, <100%	55	0.19%	94.63%
100%	9,156	5.37%	100.00%
Total	20,157	100.00%	

As can be seen in the table above, a fairly large share of corporations conduct a small percentage of their overall business in Utah. In 2012, 46% of filers reported less than 5% of their business activity taking place in Utah but paid nearly 67% of total corporate taxes. Corporations operating solely in Utah accounted for 45% of the total businesses and paid only 5.4% of total corporate taxes. A significant share of Utah corporate taxes are paid by large multistate corporations.
